

Melbourne's Intranet Leadership Forum

The Intranet Leadership Forum is the professional community for intranet managers and teams in Australia and New Zealand.

The photo above is from one of our Melbourne sessions, taken during the group discussions.

The goal of the forum: to provide intranet teams with the support they need to deliver great intranets. We do this face-to-face via facilitated discussions, and by connecting intranet teams throughout the year.

With a full-time forum manager, the Intranet Leadership Forum provides the single best way of sharing ideas and building on the successes of others.

Current Melbourne members include:

- ANZ
- Australia Post
- Australian Red Cross Blood Service
- Department of Education and Early Childhood Development
- Department of Transport
- The Guild Group

(Corporate membership also allows each member to attend their closest chapter, which is valuable for national organisations.)

Membership includes three facilitated ½ day sessions, plus an annual two-day intensive workshop. Topics covered in the last year:

- intranet demonstrations at Urbis, ANZ, Blake Dawson and Bureau of Meteorology
- managing your intranet during a recession
- content management system selection
- refining your search engine results
- essential roles in structuring your intranet team

Run by Step Two Designs, Australia's intranet experts, the forum brings in the latest thinking from around the world, plus best-practice methodologies and case studies. (All for the price of a typical commercial conference.)
